Pune, India

OBJECTIVE

Results-driven Software Engineer with expertise in Java, Spring Boot, and full-stack development. Experienced with Google Cloud, Docker, and Kubernetes. Committed to building innovative solutions that drive impactful projects and continuously improve system performance. Passionate about leveraging modern technologies to solve complex challenges.

EXPERIENCE

• MasterCard

Software Engineer

Jul'24 – Present

Pune, India

- Full-stack development in the B2B Commercial Solutions team.
- Designed asynchronous microservices communication using Axon and Kafka.
- Developed an event-driven system optimizing real-time processing.
- Integrated Dynatrace for enhanced observability and performance monitoring.
- Implemented ShedLock for safe scheduling in distributed environments.
- Engineered an Angular HTTP interceptor for secure token management and error handling.
- Built an audit generation system in Spring Boot to track critical operations.
- Contributed to multiple POCs exploring new banking features and technologies.
- Led performance optimizations via query fine-tuning and caching improvements.
- Collaborated cross-functionally to streamline processes and mentor junior team members.
- Drove innovation by integrating new tech solutions to enhance product scalability.

• Accenture

Advanced Application Engineering Analyst

Jul'22 – Jun'24

Pune, India

- Developed full-stack applications using Spring Boot and Angular.
- Created a real-time transaction monitoring system with custom audit trails.
- Implemented unit testing frameworks (Jasmine, Karma, JUnit) and optimized databases.
- Spearheaded containerized deployments with OpenShift, Docker, Kubernetes, and Helm.
- Awarded Top 3 submission in Red Hat Cloud Native School.

EDUCATION

• Vellore Institute of Technology

B.tech. in Electronics & Communication Engineering

2018 – 2022

Vellore, India

- CGPA: 7.91

PROJECTS

• Monthly Salary Calculator

Angular/Typescript interface

Jul'23 – Aug'23

- Developed an Angular/Typescript interface to resolve common taxpayer issues in India.
- Deployed the project using GitHub and Netlify.

• Product Management Service – Microservices

Spring Boot, Kafka, Keycloak, Eureka, Spring Cloud Gateway, Zipkin, Docker, Kubernetes, Prometheus, Grafana

Jun'24 – Jul'24

- Implemented Spring Boot REST components with inter-service Kafka communication.
- Developed identity and security management using Keycloak.
- Established service discovery and API Gateway via Netflix Eureka and Spring Cloud Gateway.
- Integrated a circuit breaker and distributed tracing with Zipkin.
- Deployed using Docker and Kubernetes while monitoring with Prometheus and Grafana.

SKILLS

- **Languages:** Java, Spring Boot, Typescript, Angular, JavaScript, HTML/CSS, SQL
- **Technologies:** Google Cloud, Docker, Kubernetes, Jenkins, Git, GitHub, JUnit, MySQL, Oracle, Firebase, Microservices, JWT, React
- **Concepts:** Full-stack Development, System Design, Distributed Systems, Data Structures, Algorithms
